

# PRINCE KUMAR

Full Stack Developer | B.Tech CSE 2027

+91-9142066384 | princekumar01zc@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [LeetCode](#)

## PROFESSIONAL SUMMARY

Pre-final year B.Tech Computer Science student at JUET with hands-on experience in full stack web development (React, Next.js, Node.js). Built 3 projects integrating real-time databases, RESTful APIs, and AI-based inference. Seeking a software development internship to apply and grow engineering skills in a fast-paced team environment.

## EDUCATION

**Jaypee University of Engineering and Technology (JUET)**

Bachelor of Technology — Computer Science and Engineering

Guna, Madhya Pradesh

Aug 2023 - May 2027

## TECHNICAL SKILLS

**Languages:** Java, C++, JavaScript, TypeScript

**Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS

**Backend:** Node.js, Express.js, REST APIs, JSON

**Databases:** MySQL, Firebase Realtime Database

**AI / ML:** TensorFlow.js (browser-based inference & waste classification)

**Tools:** Git, GitHub, Visual Studio Code, Postman, Arduino IDE

**Concepts:** Firebase Authentication, Real-time Systems, Agile/Scrum

**Core:** Data Structures & Algorithms, OOP, DBMS, OS, CN

## PROJECTS

**Ecopick – Eco-Friendly Waste Management System** | Node.js, Express, TensorFlow.js, HTML/CSS/JS Dec 2025

- Built full-stack waste management platform with **Node.js/Express RESTful** backend serving **5+ API** endpoints for waste data, user profiles, and transactions.
- Integrated TensorFlow.js for AI-based waste classification achieving **~85% detection accuracy** in-browser; automated cost calculation reduced manual data entry by **~60%**.
- Developed dynamic dashboard with user profiles, transaction history, and receipt download using structured JSON-based data handling.
- Implemented secure user authentication and role-based data access on the backend.

**SkillSwap – Peer Skill Exchange Platform** | HTML, CSS, JavaScript, Firebase, Google Meet API Sep 2025 – Nov 2025

- Developed skill-exchange web application enabling **50+ test users** to post, request, and accept skill-swap offers with conditional UI states preventing premature interactions.
- Built real-time one-to-one chat using Firebase Realtime Database with **~100ms average** message delivery and in-chat **Google Meet** link generation for live sessions.
- Implemented complete **Firebase Authentication** lifecycle (register, login, logout, password reset) reducing auth-related issues to zero during QA testing.
- Designed full request lifecycle (send/accept/reject) — users can only chat after a request is mutually accepted.

**TailorHub\_Web – Tailor Service & Order Management Platform** | React.js, Node.js, Express.js, MySQL Jan 2026

- Developed a full-stack tailoring marketplace enabling customers to place custom orders, manage measurements, and communicate with tailors in real time.
- Built and integrated **45+ secure REST APIs** with JWT authentication, **RBAC middleware**, and optimized MySQL database **schema (10+ tables)**.
- Implemented real-time chat and notification system using **Socket.IO** with typing indicators, read receipts, and multimedia file sharing support up to **15 MB**.
- Designed responsive dashboards with React.js and Tailwind CSS, improving workflow efficiency and user experience by **40%**.
- Enhanced backend reliability using centralized error handling, validation middleware, connection pooling, and automated email notifications.

## CERTIFICATIONS

Android Development using Java — Udemy | Full Stack Web Development (HTML, CSS, JS, Node.js) | Firebase Authentication and Realtime Database
